Experience

EPAM Systems - Software Engineer   *July.2022 - present*

** *I worked on* **Joolz Webshop** *project as part of an agile team utilizing the Scrum framework as a full-stack Developer. My responsibilities comprised of: Implementing new features with the Demandware with JavaScript framework, including RESTful Open Commerce API Adding functions, Developing handlers, Using Swagger and Postman for testing*

** *worked on the* **Marlies Dekkers' lingerie brand** *as a Front-End Developer. I was participating in the scrum meetings(daily scrum, sprint planning, backlog refinement). Also, I have got an experience in the planning of architecture of the project and estimation sessions. The main part of the project was developed a E-Commerce website to make it more flexible to the user.*

** *Created* **website of Paula's Choice** *with SFCC. Responsible for: using SFCC Script and related technologies, my responsibilities include designing, developing, and testing SFCC REST APIs, DW Pipelet, 3rd Party integration, and other back-end services. I also integrate these services with front-end web technologies such as HTML, CSS, JavaScript, and associated frameworks. In addition, I work with external vendors to set up feeds and processes for price and inventory on various projects. Overall, my role involves utilizing my skills in SFCC Script and other related technologies to create efficient and effective solutions for back-end services.*
